

VOYAGER/KVMA 2.0

The KVMA 2.0 is an adapter plate that converts the power interface on any Voyager module to a MIL-C-26482 circular power connector. The circular connector is a rugged 8-2 shell size with a secure locking mechanism.

There are no electronic components in the KVMA 2.0, the adapter is rated to support up to 13 Amps and provides a physical connection between the input connector and the output connector. Therefore, any voltage applied to the input will appear at the output.

Part No: KLAS-VOY-KVMA2

KEY FEATURES

- Fits any standard Voyager module
- Allows a Voyager module to be powered via a MIL-C-26482 circular DC power connector
- Rated for 13 Amps
- Available in PW configuration
- Optional 150W AC/DC add-on PSU available (KLAS-ACCY-0073) with regional plug type variations (EU, UK, US, AU)
